

Sub
B1
--18. A cosmetic composition comprising (a) an aqueous dispersion comprising at least one insoluble polymer particle and (b) an emulsion comprising at least one non-aminated silicone α,ω -disilanol.

19. A composition according to claim 18, wherein the at least one insoluble polymer particle comprises monomeric units chosen from styrene, butadiene, ethylene, propylene, vinyltoluene, vinyl propionate, vinyl alcohol, acrylonitrile, chloroprene, vinyl acetate, urethanes, isoprene, isobutene, vinyl ether, vinylpyrrolidone, vinylimidazole, acrylic acid, an ester of acrylic acid, an amide of acrylic acid, methacrylic acid, an ester of methacrylic acid, an amide of methacrylic acid, maleic acid, an ester of maleic acid, an amide of maleic acid, crotonic acid, an ester of crotonic acid, an amide of crotonic acid, itaconic acid, an ester of itaconic acid, an amide of itaconic acid, and mixtures thereof.

Sub
B2
20. A composition according to claim 18, wherein the at least one insoluble polymer particle is chosen from copolymers of alkyl acrylate, alkyl methacrylate, one or more ethylenic carboxylic acids having from 3 to 5 carbon atoms, one or more salts of ethylenic carboxylic acids having from 3 to 5 carbon atoms, and mixtures thereof.

21. A composition according to claim 20, wherein the alkyl radicals contain from 1 to 5 carbon atoms.

Sub
B3

22. A composition according to claim 20, wherein the at least one insoluble polymer particle is chosen from ethyl acrylate/methyl methacrylate/methacrylic acid/acrylic acid copolymers.

23. A composition according to claim 20, wherein the at least one insoluble polymer particle is chosen from hydroxyethyl methacrylate/methyl methacrylate/methacrylic acid/butyl acrylate copolymers, ethyl acrylate/methacrylic acid/t-butyl acrylate copolymers and methyl methacrylate/acrylic acid/butyl acrylate copolymers.

24. A composition according to claim 18, wherein the at least one insoluble polymer particle results from the polymerization or copolymerization of monomers chosen from styrene, butadiene, ethylene, propylene, vinyltoluene, vinyl propionate, vinyl alcohol, acrylonitrile, chloroprene, vinyl acetate, urethanes, isoprene, isobutene, vinyl ether, vinylpyrrolidone, vinylimidazole, acrylic acid, an ester of acrylic acid, an amide of acrylic acid, methacrylic acid, an ester of methacrylic acid, an amide of methacrylic acid, maleic acid, an ester of maleic acid, an amide of maleic acid, crotonic acid, an ester of crotonic acid, an amide of crotonic acid, itaconic acid, an ester of itaconic acid, an amide of itaconic acid, and mixtures thereof.

25. A composition according to claim 18, wherein the at least one insoluble polymer particle is present in an amount ranging from 1 to 35% by weight, with respect to the total weight of the composition.

26. A composition according to claim 18, wherein the at least one insoluble polymer particle is present in an amount ranging from 5 to 20% by weight, with respect to the total weight of the composition.

27. A composition according to claim 18, wherein the at least one non-aminated silicone α,ω -disilanol is present in an amount ranging from 0.05 to 10% by weight, with respect to the total weight of the composition.

28. A composition according to claim 18, wherein the at least one non-aminated silicone α,ω -disilanol is present in an amount ranging from 0.1 to 3% by weight, with respect to the total weight of the composition.

29. A composition according to claim 18, wherein the at least one non-aminated silicone α,ω -disilanol is chosen from a polydialkylsiloxane α,ω -disilanol, a polyalkylarylsiloxane α,ω -disilanol and a polydiaryldialkylsiloxane α,ω -disilanol.

30. A composition according to Claim 18, wherein the at least one non-aminated silicone α,ω -disilanol is chosen from polydimethylsiloxane α,ω -disilanol.

31. A composition according to claim 18, wherein the composition is a hairsetting lotion or a blow-drying lotion.

Con'd

Sub C2

32. A composition according to claim 18, which further comprises at least one propellant, and wherein the composition is pressurized in an aerosol container.

33. A composition according to claim 32, wherein the at least one propellant is chosen from volatile hydrocarbons.

mu 117

34. A composition according to claim 33, wherein the at least one propellant is chosen from n-butane, propane, isobutane, pentane, chlorinated hydrocarbons, fluorinated hydrocarbons, carbon dioxide gas, nitrous oxide, dimethyl ether, nitrogen, and compressed air.

Cen's*

35. A composition according to claim 32, wherein the at least one insoluble polymer particle is present in an amount of at least 3% by weight, with respect to the total weight of the pressurized composition.

36. A composition according to claim 32, wherein the at least one insoluble polymer particle is present in an amount ranging from 5 to 35% by weight, with respect to the total weight of the pressurized composition.

37. A composition according to claim 32, wherein the at least one propellant is present in an amount ranging from 5 to 90% by weight, with respect to the total weight of the pressurized composition.

38. A composition according to claim 32, wherein the at least one propellant is present in an amount ranging from 10 to 50% by weight, with respect to the total weight of the pressurized composition.

39. A composition according to claim 18 further comprising a cosmetically acceptable medium.

Sub All
40. A process for treating keratinous substances comprising applying to the keratinous substances a cosmetic composition comprising (a) an aqueous dispersion comprising at least one insoluble polymer particle and (b) an emulsion comprising at least one non-aminated silicone α,ω -disilanol.

MD 17
41. A process according to claim 40 further comprising rinsing the keratinous substances with water after a period of time.

At Caris
Sub \$51
42. A process according to claim 40, wherein the keratinous substances are chosen from hair.

43. A process for treating keratinous substances comprising applying to the keratinous substances a cosmetic composition comprising (a) an aqueous dispersion comprising at least one insoluble polymer particle, (b) an emulsion comprising at least one non-aminated silicone α,ω -disilanol, and (c) at least one propellant, wherein the cosmetic composition is pressurized in an aerosol container.

MD 57
44. A process according to claim 43 further comprising rinsing the keratinous substances with water after a period of time.

Sub \$61
45. A process according to claim 43, wherein the keratinous substances are chosen from hair.--
